PROFESSIONAL SUMMARY

Backend-focused software engineer with hands-on experience building scalable backend systems and production-grade APIs. Skilled in architecting multi-tenant platforms using TypeScript, Node.js, Express, and PostgreSQL, alongside AI solutions spanning computer vision, deep learning, and data-driven applications.

TECHNICAL SKILLS

- **Area of Focus:** Computer Vision, Machine Learning, Deep Learning, Data Engineering, MLOps, AI Systems, LLM, GenAI
- **Languages:** Python, TypeScript, JavaScript, SQL, Java, C, C++ , HTML, CSS
- **Developer Tools:** Microsoft Fabric, OneLake, Lakehouse, Apache Spark, Delta Lake, Tableau, PowerBI, IBM Watson Studio, Docker, Linux, Jira, Slack, Vercel, Figma, Miro
- **Technologies / Frameworks:** Node.js, Express.js, React, Next.js, PostgreSQL, REST APIs, Zod, JWT, AWS, FastAPI, TensorFlow, PyTorch, Keras, YOLO, scikit-learn, Apache Airflow
- **Behavioral Skills:** Leadership, Effective Communication, Team Collaboration, Problem-Solving, Agility

EXPERIENCE

GrubPac Technologies

March 2026 – Present

Junior Developer (Backend)

Delhi, India

- Designing and building scalable REST APIs using Node.js, Express, TypeScript, and PostgreSQL for smart logistics and delivery management platforms.
- Implemented a role-based access control (RBAC) system with 22+ granular permissions, role hierarchy, tenant isolation, and secure operational workflows.
- Built and maintained 20+ backend API endpoints with transactional database operations, Zod schema validation, JWT authentication, and structured audit logging.
- Optimized PostgreSQL queries and multi-table operations through indexing, parameterized SQL, and efficient data-access patterns for scalable SaaS architecture.

PROJECTS

IntelliStock Pro - AI Powered Stock Prediction Analytics | *React, FastAPI, Ensemble Models* | [GitHub](#)

- Built a stock-price prediction system using a six-model ensemble trained on 2.5M+ historical records, achieving **85%** accuracy on the test set.
- Developed a FastAPI backend and React dashboard to run daily forecasts and allow users to simulate portfolio scenarios.
- Added a news-sentiment feed and risk metrics to flag events and estimate downside exposure.

Real-Time Human Height Measurement | *MediaPipe, Kalman Filter, FastAPI, React* | [GitHub](#)

- Implemented a real-time height measurement system using MediaPipe landmarks and a Kalman filter with **±2 cm** typical accuracy.
- Built a GPU-enabled FastAPI service processing video at **30 FPS** with end-to-end latency under **100 ms**.
- Designed a React interface with auto-calibration and guided setup to ensure measurement consistency.

AWS-Powered YouTube Data Analytics Pipeline | *AWS Glue, Lambda, Athena, QuickSight* | [GitHub](#)

- Built a scalable ETL pipeline using AWS Glue and Lambda to ingest, clean, and store YouTube data in S3 for Athena querying.
- Optimized transformations and queries, reducing processing time by **30%**.
- Created QuickSight dashboards to visualize views, watch time, and engagement trends for data-driven decisions.

CREDENTIALS

- | | |
|--|---------------|
| • Microsoft Certified: Fabric Data Engineer Associate (DP-700) Link | July 2026 |
| • DataCamp Certified: Associate Data Engineer Link | May 2024 |
| • DataCamp Certified: Associate Data Analyst Link | May 2024 |
| • Google Business Intelligence Certification Link | April 2024 |
| • Google Data Analytics Certification Link | February 2024 |

EDUCATION

R. C. Patel Institute of Technology, An Autonomous Institute

December 2021 – June 2024

Bachelor of Technology in Data Science **CGPA: 7.39/10**

Shirpur, Maharashtra

R. C. Patel Polytechnic

August 2017 – May 2021

Diploma in Computer Science **Percent: 89.09%**

Shirpur, Maharashtra
